

SEWAGE PUMPING STATIONS

BASE MOUNTED

Gorman-Rupp Base Mounted pumps are pre-engineered units with an extensive selection of pumps, motors, controls, piping and accessories. Gorman-Rupp has many standard designs for new installations or custom designs can be provided for existing installations with minimum hook-up time.

Base Mounted pump stations are available with 2" – 10" Super T Series® pumps and 3", 4" and 6" Ultra V Series® self-priming centrifugal trash pumps to match system requirements. For consistently heavy flows, a third or fourth pump may be added. Flows are available to 3400 gpm on single pump operation.

For high-head flow or high head/low flow applications or when system requirements exceed these ranges, an UltraMate® unit can be connected to the Ultra V Series pumps, further extending pumping capabilities.
