

SEWAGE PUMPING STATIONS

RELIASOURCE® 8x12 ABOVE GROUND

RELIASOURCE®

Gorman-Rupp's ReliaSource® 8x12 Above Ground packaged sewage lift station is a complete system, ready for immediate installation and hookup to piping and power. The ReliaSource 8x12 is provided with an easily removable roof and maintenance access panel on two sides. It also comes with a man-door for entry into the station.

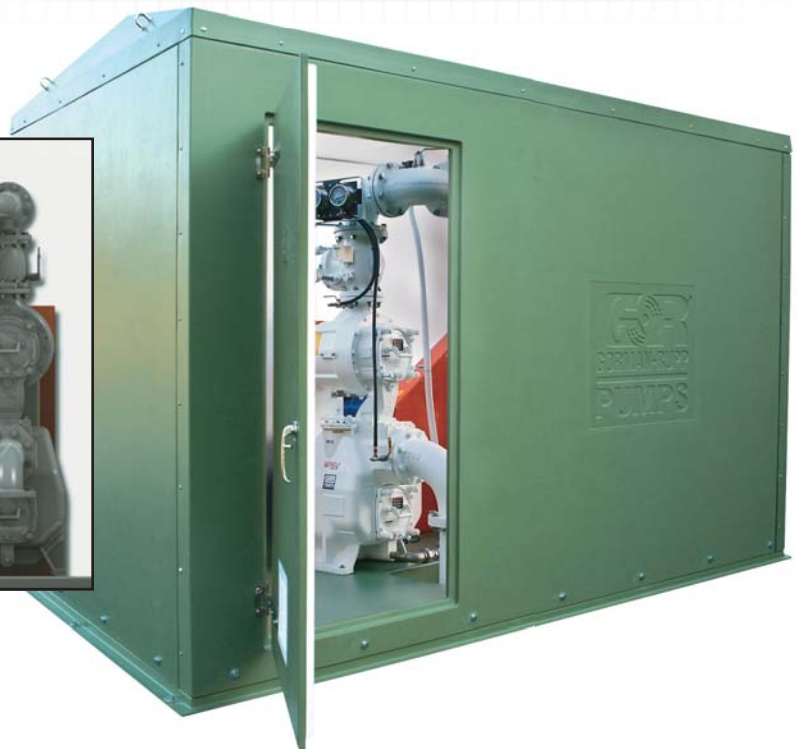

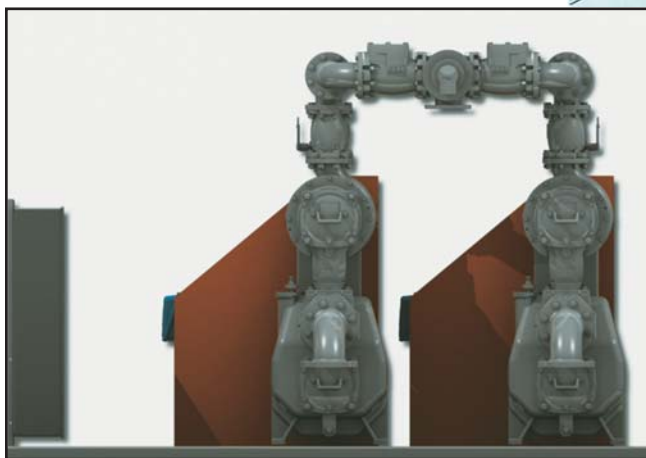

The ReliaSource 8x12 accommodates pump configurations sized to meet your pumping requirements. Super T Series® pumps are available in sizes 2" through 8" in duplex arrangements up to 100 HP and in 2" through 4" sizes for triplex pump configurations. Ultra V Series® pumps are available in 3", 4" and 6" duplex arrangements up to 100 HP, and in 3" and 4" sizes up to 60 HP for triplex arrangements. Series arrangements with 3" and 4" VS pumps up to 100 HP can also be configured. Flow capacities range from 100 to 2400 GPM and up to 250' TDH.

Outside, the enclosure is aesthetically pleasing, provided in standard forest green color which blends in with the environment. The fiberglass enclosure is manufactured with NidaFusion STO

for flexural strength, excellent fatigue and delaminating resistance. NidaFusion STO complexes are composed of a sheet of closed-cells foam, covered with a reinforcing fiber layer on each side. These three elements are linked together by fiberglass bridging strands, which go

through them obliquely, forming a triangular truss network. NidaFusion STO core is a product of Nida-Core Corp.
