Triac

EX Series Limit Switches

The Triac EX Series

hazardous location Limit Switch provides a compact design and low cost for both visual and remote electrical indication of rotary valve/actuator position. The heavy duty design and wide variety of options make the EX Series the ideal multi-purpose Limit Switch for use in NEMA 4, 4X, 7 and 9 applications.

Features:

- **Aluminum Housing:** Polyester Powder Coating
- **Twin Shaft Body Design:** The primary shaft is located in the housing base and connects to a mating shaft located in the housing cover. This twin shaft feature allows easy and accurate housing assembly by eliminating the blind-hole configuration associated with competitive switch boxes.
- **Multiple Switch Options:** Wide variety of mechanical, proximity and inductive switch options provide the most effective and economical choice for each specific application.
- **Visual Position Indication:** The 3D rotor provides high visibility confirmation of valve/actuator position. The splined retainer allows adjustment to coincide with the exact valve position.
- **“Easy-Set” Cams:** Splined, spring loaded and independently adjustable. This design offers tool-free calibration and positive vibration resistant engagement.
- **Multiple Cable Entries:** Standard with two 1/2" NPT cable entries with option for third 1/2" or 3/4" NPT cable entry.
- **Standardized Mounting:** ISO F05 mounting pattern and VDI/VDE3845 shaft
- **Options:** AS-i digital communication interface card, 3-position dribble control, 4-20mA feedback transmitter, special terminal strips, NAMUR mounting brackets.
